Ann	lication	delete

## **Application delete**

This deletes the application and empties the nonvolatible data memory, deleting the QCL program and, if present, deleting the HMI program.

The following table gives the sequence of operations performed and any possible errors:

Message	Description	Possible errors	
Reset retentive data	Empty nonvolatible data memory	Write file error	
Delete QCL application	Deletion of the QCL program	Write file error	
Delete HMI application	Delection of the HMI program (if display installed)	Write file error
