Sommario

Downl. retentive data to DEVICE

This function creates a file on external mass storage (MMD/SD or USB) containing the retentive data values.
The file created is named "**applic.dat**" and is the same as the file obtained by the "Save Data…" procedure in the QView development environment. The function can only be performed if there is a valid QCL application in the controller.

The procedure performs the following steps:

- Check the presence of the MMC/SD or USB card.
  The **"Check *DEVICE* presence"** message is given.
  On *DEVICE* appears MMC or USB, depending on what is selected.
- Mounting the MMC/SD or USB card.
  The **"Mounting device…"** message is given.
- Check the presence of the QCL program
  The **"Checking application presence…"** message is given.
- Check the validity of the retentive data
  The **"Checking retentive data…"** message is given.
- Open the applic.dat destination file on the external MMC/SD or USB card
  The **"Open destination file…"** message is given.
- Write the headers in the destination file
  The **"Write headers to destination file"** message is given.
- Write the retentive data in the destination file
  The **"Write data to destination file"**.
  NOTE: the percentage progress of the operation is given during this step
- Close the file and end the operation
