

Sommario

To activate the internal termination resistance see paragraph [Setup Termination resistances](#)

Communication speed	125, 250, 500, 1000 Kbit/s
Max. number of Drivers/Receivers on the line	100
Max. cable lengths	500m @ 125Kbit/s, 250m @ 250Kbit/s, 100m @ 500Kbit/s, 25m @ 1000Kbit/s
Input impedance	>15Kohm
Short-circuit current limit	45mA

CAN BUS connection examples.

Caution:

Close DIP's JP1 and JP2 and insert the termination resistances (RL, RH) on the last device of the chain.
