

Inhaltsverzeichnis

This procedure views the name and size of all files found in the internal NAND flash mass storage.

The procedure performs the following steps:

- Calculate the number of files in the internal mass storage.
- The „Searching files...“ message is given.
- If zero files are found the „No Files Found“ message is given and the procedure ends.
- The file name and size in bytes „<filename> - <size>B“ of each file found is shown.
- Press the BOOT button or the @key@ key again to continue with the next file when the „Press BOOT or @key_vis@ to show next filename“ message is given.
- Close the internal storage device and end procedure.
