Positive Transition-Sensing Toggle Contact 3

Positive Transition-Sensing Toggle Contact

Function name	PTSTCN_010
Function version	1.0
Function state	stable
Compatibility with IEC61131-3	not compatible

Graphic symbol :

Input / Output :

Name	Belonging Group	Access	Types of data	Description
reference	Normal	R, RW	F, B, W, L, S	Reference variable of the contact

Description :

If the reference variable is FLAG type:

The state of the right link passes alternatively from OFF to ON (toggle) at each positive transition, from 0 (zero) to 1 (one), of the reference variable (indicated with **reference**). The state of the left link is ignored.

If the reference variable is BYTE, WORD, LONG and SINGLE type:

The state of the right link passes alternatively from OFF to ON (toggle) at each positive transition, from the value 0 (zero) to a value different from 0 (zero), of the reference variable (indicated with **reference**). The state of the left link is ignored.
