AD_T_TBL (Add to Table)

Function name	ADTTBL_010
Function version	1.0
Function state	stable
Compatibility with IEC61131-3	not compatible

Graphic symbol :

Input / Output :

Name	Belonging Group	Access	Types of data	Description
ON	Left Power Flow			IEC1131-3 enable input
DATA	Normal	R , RW	F , B , W , L , S	Data to add to the table
TBL	Name array			Name array (table)
ENO	Right Power Flow			IEC1131-3 enable output

The function block AD_T_TBL allows to add a data in a cell of an array (table). The new data is added in the table after the last record.

The condition error that set ENO = 0 is overflow table. This happens when you try to add a data in the table while the last record was pointing to the number of the elements of the table minus one.
