<i>LIFO (Last In First Out)</i>	3
--	----------

LIFO (Last In First Out)

Function name	X
Function version	1.0
Function state	stable
Compatibility with IEC61131-3	not compatible

Graphic symbol :

Input / Output :

Name	Belonging Group	Access	Types of data	Description
ON	Left Power Flow			IEC1131-3 enable input
TBL	Name array			Name of the table
DATA	Normal	W , RW	F , B , W , L , S	Extracted data
ENO	Right Power Flow			IEC1131-3 enable output

The operation Last In First Out (LIFO) cancels the last record of the table (TBL) and returns the value in the specified address from DATA. For each executed record, the number of records (pointer) of the table is decreased of 1.

The error conditions that set ENO = 0: empty table.
