<i>Bit SET</i>	3
-----------------------------	---

Bit SET

Function name	SETB_010
Function version	1.0
Function state	stable
Compatibility with IEC61131-3	not compatible

Graphic symbol :

Input / Output :

Name	Belonging Group	Access	Types of data	Description
EN	Left Power Flow			IEC1131-3 enable input
Data	Normal	RW	F , B , W , L	Data in which to set the bit
Bit	Normal	R , RW	F , B , W , L	Data with the number of bits to set
ENO	Right Power Flow			IEC1131-3 enable output

Description :

The function Bit SET, combines through OR the corresponding bit of the variable Data with the bits of the variable maschera and load the result in bits in the variable Data.

Where the variable **maschera** is: **maschera** = (2 Bit)

Error conditions are set ENO = 0: none.
