Qworkbench 1.1.7 3

Qworkbench 1.1.7

It is a collection of design environment for Qem products.

Before install a new software make sure that you uninstall a previous version.

The installer include:

- **QView-5.1**: with the last library and ready for Windows 7 and vista operative system.
- **QPaint-5.4**: Graphics design environment for qmove systems.
- **QView-6.0**: New design environment with powerful QCL language syntax.
- **QPaint-6.0**: Graphics design environment for qmove systems programmed with Qview version 6.
- **QResourcesManager-1.3**: Service to manage communication with local and remote connections.
- **Qnet SDK**: Software Development Kit for communication with qmove target by API (application software interface).
- IQ009 software driver: updated to 2.8.30 version.

License Manager utility to manage software license (used only by other software utility for example ProfileImporter) is in standalone installer.
