Front panel customization kit	3
--------------------------------------	-------	---

Front panel customization kit

You can customize their own keyboards. It is possible to customize the function keys and the logo.

For each model there are label Kit, which can be supplied in bulk or already applied to the front panel.

In case the basic models are ordered with standard graphics films, these will be delivered already mounted on plain label (without symbols). In the other cases the graphics codes of the film symbology also function keys.

In order to create your own custom labels, you can download from www.qem.it label designs, which put his logo and the desired symbology.

[Guide to creating and printing labels](#)

Symbols used PRELIMINARY
